

Achieve Peak Financial Performance with g4 Studio

Revenue cycle software for specialty healthcare

Increase Cash Flow and Revenue with the Industry's Leading Platform

Ensuring your practice is getting paid quickly and accurately can be the difference between financial health and major issues for you, your staff, and patients. Specialty practices in particular need reliable, easy-to-use tools for streamlining their revenue cycles. A single unpaid bill can carry major consequences and it takes specialized expertise to navigate the process successfully.

Unlimited Systems understands the sensitivities and complexities that influence the specialty healthcare revenue cycle. For more than 15 years, we've been advancing the leading platform for accelerating practice cash flow, maximizing revenue, and eliminating time-consuming manual processes from the specialty practice workflow. The result: our clients achieve a stronger bottom line with less effort and increased time spent caring for patients.

g4 Studio for Specialty Healthcare

Used to manage \$35+ billion in annual charges across more than 2,600 specialty locations, g4 Studio delivers a user-friendly platform designed for the unique needs of specialties. The platform simplifies claim and payment processing while delivering intelligent reporting and analytics. Designed for fast, error-free billing, g4 Studio also streamlines patient intake, eligibility verification, charge capture and optimization, and remittance posting. Using g4 Studio empowers practices to:

Increase front office workflow efficiency by automating patient intake and checkout workflows, including appointment arrival, registration data review, and copay collection

Maximize reimbursement by applying carrier-specific rules and a broad library of specialty-specific claim edits to validate claims faster and with more complete results

Reduce staff time by automating payment posting for even the most complicated and non-standard ERA files

Eliminate the expense of manual processes with a configurable, rules-based engine that automates eligibility verification

Improve cash flow through automated alerts that highlight underpayments and denials

Improve staff productivity through auto-identification and assignment of high priority tasks

Delivering Tangible Return on Investment (ROI)

At Unlimited Systems, we're proud to deliver a demonstrable return on investment for our clients. In addition to high levels of satisfaction, users of g4 Studio also benefit from measurable increases in staff productivity, cash flow, and revenue.

Time Savings — Staff Productivity

A key value metric for specialty practices to consider when evaluating a revenue cycle management platform is reduction in manual effort – time is money. Customers who adopt the full range of best practice workflows with g4 Studio typically realize a **35% reduction in process steps, keystrokes, and clicks.**

93%

Cash Flow and Revenue — Cleaner Claims

Getting paid accurately and quickly is critical to your financial health. It's also tied directly to your ability to submit claims that get paid on the first pass. That means error-free, "clean" claims going out the door. With g4 Studio, clients achieve **first pass clean claim rates of 93% and higher**, raising collection rates by approximately 2.5% per provider per year.

+10%

Cash Flow and Revenue — Increased Patient Assistance Awards

For specialties like Oncology, securing more frequent and higher value patient assistance awards benefits patients and practices alike. Enhancing financial counselor productivity through ready access to accurate and detailed patient financial records is key. Practices using g4 Studio typically realize a **10% boost in revenue** through increased patient assistance awards.

90%

Cash Flow and Revenue — Increased Point-of-Service Collections

Collecting at the point of service is proven to increase a practice's likelihood of collecting the full balance due from their patients. A highly sensitive aspect of the revenue cycle, ensuring accurate information is available at the time of patient interaction is key. Dedicated front office workflows in g4 Studio have helped clients achieve a **90% success rate** for point-of-service collections.

\$150k

Cash Flow and Revenue — Charge Capture Optimization

Complex specialty claims require focused attention and a high level of scrutiny. Missed charges equal lost revenue, and slow, manual processes create unnecessary lag times. With g4 Studio, clients experience an average **3% increase in charge capture accuracy** and an average **two-day reduction in time to file**, which can equate to **\$150,000 or more per specialty provider per year.**
